(54) INK JET PRINTER

(57)Abstract:

PURPOSE: To print at high speed and density by using a line type ink jet printer having comparatively low density.

CONSTITUTION: In an ink jet head 12, ink jet nozzles 13 are arranged in the direction of line at comparatively low density and at a dot pitch P with regular intervals. The head 12 is carried by a carriage 16. The carriage 16 can be driven to be sent at a divided pitch p obtained by further dividing the dot pitch P by an eccentric feed cam 18. On the other hand, a paper 11 is sent or returned for a predetermined quantity by a feed roller 29 or a return roller 20, and high density printing is performed by moving the paper 11 at each dot position.
